To whom it may concern,

Apache Nitrogen Products, Inc. has two Coffin Turbo Pump, Inc. (CTPI) model CG turbine drive boiler feed pumps in continuous service for over 20 years and the pumps have proven reliable and a good value. CTPI's part and service support have been excellent and additional support from CTPI's engineering team has very been available and responsive when called upon to review options for plant improvements. We highly recommend CTPI's products for boiler feed service.

Sincerely,

A handwritten signature in black ink, appearing to read "Anthony Brown", is written over a thin horizontal line. The signature is stylized and cursive.
